International Recognition for OGMA's Excellence

OGMA elected as the Best European Independent MRO Operation of 2008 by Overhaul & Maintenance Magazine.

This award recognizes independent MRO companies operating in Europe for excellence in aviation aerospace aftermarket operation.

OGMA was selected to receive this prestigious award due to its commitment to the environment; its forward-looking developments in aerostructures, highlighting composite materials and repairs; and its maintenance services to military, commercial and executive aviation customers.

The award was presented at a special ceremony during the AVIATION WEEK's MRO Europe 2008 Conference & Exhibition.

About OGMA

With a 90 year experience, OGMA – Indústria Aeronáutica de Portugal is nowadays a company committed to supplying high quality solutions and services and an added value to the aeronautical market for maintenance and aero structures.

OGMA offers a complete portfolio of services to customer operators of military, commercial and executive aircraft, at all times trying to exceed the more challenging expectations.

The experience of the company is credited by different manufacturers and aeronautical authorities, including Embraer, Rolls-Royce, Lockheed Martin and Turbomeca. OGMA is an Aeronautical Maintenance Centre certified under FAR Part 145, EASA Part 21J (DOA) and EASA Part 21G (POA) as well as of other national and international entities. The management of the Quality is assured by AS9100, ISO 9001:2000 and AQAP2110 certifications.

The OGMA is an Incorporated Company participated with a 65% share by Airholdings SPSC (Embraer 70% and EADS 30%) and 35% by the Portuguese Government through Empordef.

With headquarters in Alverca, approximately 20Km north of Lisbon, currently employs 1.637 people.
